

Daniel Bojorquez

Full-stack engineer

Hermosillo, Mexico +52 (662) 297-1219 danielbojorquezf@gmail.com github.com/DanielBojorquezf
linkedin.com/in/daniel-bojorquez

Nine years shipping web products and the path around them: apps, APIs, Docker, and AWS. What I enjoy most is problem solving: starting something from zero, then staying for the troubleshooting when it breaks.

I am glad to work alone, with a small crew, or inside a larger team. I really like implementing AI — in the daily workflow and in the product — and I keep learning how to include more of it without skipping regulation or security.

Education

Computer Systems Engineer

ITH, Hermosillo · 2015 — 2019

The degree that turned weekend code into systems work. Java, PHP, and C#.

Programming Technician

CBTIS 11, Hermosillo · 2012 — 2015

Where I started: C, PHP, Java, and my first Android apps.

Languages

English and Spanish

I work with teams in both. Writing, calls, and handoff notes.

Experience

Full-stack engineer

2022 — Present

Seagage

- Product UIs in Svelte and Angular, plus React / Next.js when it fits.
- Laravel and Express APIs on MySQL, shipped in Docker.
- AWS in production and CI with GitHub Actions and Jenkins.
- AI in the daily workflow and in the product, with an eye on security.

Full-stack web developer

2019 — 2022

Powdevs, Hermosillo

- Client apps in Angular, Svelte, Laravel, and Express, including the first AWS deploys.
- Scrapers, PostgreSQL, and cron jobs for data collection.

Full-stack developer

2017 — 2019

Rivka Development, Hermosillo

- AngularJS and Laravel apps, plus an Ionic client on the same API.
- Scrapers and scheduled jobs for data nobody wanted to type in.
